Skills

Languages: SQL, Python, R, Java, JavaScript

Analytics: Tableau, Power BI, Excel, SQL-based reporting, Airflow, ETL pipelines, dimensional modeling

Platforms: Google Cloud Platform, Redshift, Azure SQL, Git, GitHub, VS Code, Jupyter, RStudio, Kibana

Experience

Quality Assurance Manager at Lirvana Labs

Remote, Canada | May. 2025 – Present

- Led QA workflows for AI-driven learning systems, ensuring content quality for 33k+ learners across 70+ languages
- Tracked content quality across 14+ releases, cutting recurring issues by 30% through regression and release checks
- Developed and maintained internal analytics dashboards to monitor model performance, release quality trends, and operational metrics across multiple deployments
- Performed recurring and ad-hoc data analysis to support operational planning, issue triage, and stakeholder reporting
- Standardized QA documentation and internal tools, improving analytics pipeline reproducibility and consistency

Data Analyst Co-op at Samsung Electronics

Vancouver, BC | Jan. 2024 – Apr. 2024

- Led an independent analytics project by analyzing large-scale project and platform data from Samsung Knox Suite using SQL and BI tools, identifying risks and performance gaps
- Designed SQL queries and BI reports to support ongoing operational reporting, performance monitoring, and leadership decision-making across enterprise platforms
- Improved and standardized 100+ dashboards across Tableau and Power BI, increasing data consistency and supporting decision-making across multiple teams
- Engineered and optimized ETL pipelines using Airflow and SQL (CTEs, window functions), improving data processing efficiency by 30% and strengthening data integrity across downstream analytics
- Collaborated with engineers and PMs to align analytics outputs with project milestones and roadmap planning

Business Intelligence Engineer Co-op at TELUS

Vancouver, BC | Jan. 2023 – Aug. 2023

- Developed and optimized cloud-based ETL pipelines using Python, Spark, SQL, Power BI, Tableau, and Google Cloud Platform, processing millions of records across enterprise datasets, enabling timely delivery of insights
- Reduced data processing time by 50% and lowered compute costs by 25% through pipeline optimization, batch processing, and efficient data modeling; accelerating access to business-critical insights
- Enhanced Revenue Forecasting Tool with new features in JavaScript, SQL, React, and Redux, increasing adoption
- Produced recurring business and performance reports and supported data reconciliation across multiple data sources to ensure accuracy for downstream stakeholders

Data Science Teaching Assistant at University of British Columbia

Vancouver, BC | Sep. 2022 – May. 2025

- Taught weekly office hours and collaborated to support teaching and grading for 3000+ students covering Data Wrangling and Visualization, Version Control, Classification, Regression with k-NN, and Clustering with K-Means
- Consistently received 95% for effectively interpreting data and supporting instructional decisions

Leadership and Involvement

Marketing Director at UBC Women in Data Science - Built digital presence from 0 to 1,700+ followers, converting 400+ members, tripling attendance at diversity-focused hackathons, and boosting student engagement and inclusivity

Student Engagement Committee at UBC Undergraduate Research Opportunities - Coordinated research fairs and workshops, securing professional speakers and leading interactive panels for student engagement

External Executive at Undergraduate Statistics Society - Managed outreach and events, engaging 1,000+ members

Education

University of British Columbia

Sep. 2021 – May. 2025

Bachelor of Science, Statistics, Minor in Data Science, Concentration in Computer Science

Relevant Coursework: Probability & Statistics, Machine Learning, Data Wrangling & Visualization, Databases, ETL
